

# Product data sheet

## SP40F antistatic

Backing	F-paper
Bonding	Synthetic resin
Grain	Silicone carbide
Coating	Dense
Application area	Wood, metal, paint, glass, porcelain, stone (screed), rubber, plastic (including melamine resin film, UV-lacquer, DD-paint)
Application	Wide-belt, long-belt and edge-belt grinding machines
Advantages	Aggressive chip removal with long lifetimes thanks to synthetic resin bonding and the hard and sharp-edged silicon carbide grain. Perfect finish on paint surfaces and in the wood and furniture industry.

### Product range

Rolls

Wide belts

Narrow belts

Segment

Segmented belts

### Application

Stationary machine sanding

### Available grits
